Request Type: Question

Topic: Library>Checking Out and Renewing Books/Library Cards

Location of Request: Beverly Hills CA

My Original Request

When I browse the library site and step away for a few minutes, I see that the library redirects users to a CBS interactive search site (search.com). One would expect to be redirected to a city site, if at all. Beverly Hills is the only library that redirects to a commercial search engine.

I'm wondering about the arrangement by which this happens. Is this a funding mechanism, and at what level was it decided? Some of us may object to a CBS site, since they are a major proliferator of billboards in our region. Some may not see CBS as a good citizen for our region.

Thanks very much,

Mark Elliot
